Chapter 5

Mission Operation and Ground Segment

The SUVT-170 mission is to be an international facility accessible to scientists from participating Countries as well as from the whole international community.

5.1 Possible Schemes for Mission

Management

The following is a description of alternative schemes, which are being discussed within the Italian SUVT Consortium and with the Soviet partners, regarding the overall conduct of the mission.

The first case considered is that of a totally unconstrained observatory, similar to IUE; this means that the observer is given a fixed amount of observing time for a particular program, with an approved list of targets. This time will be allocated in one or more slots, as agreed with Mission Planning (taking into account the observers’ requests and the mission constraints). During one of these slots, the observer may make use of the time as it suits him: select which targets to observe from his list (or even adding new objects; provided, of course, he has sufficient information for pointing and has verified that no spacecraft constraints
Document for which no computer readable source exists any longer

Partial scan of original hardcopy of 22 pag. (available on request) supplied
The present document describes the importance of the immediate occurrence in building a physical signal in the event of a sudden change, as well as the role of the operator and their actions. The document emphasizes the need for quick and efficient communication, particularly in situations requiring immediate action.

**Mission Areas**

5.2 Pre-requisite Information from Other

Methods being used, the existence of a communication chain of command, and the procedures needed to coordinate the various aspects of the mission.
Data Transfer Between USSR and Iran and

The situation between the USSR and Iran and the relationship of the different information will be evaluated in terms of the following:

- The security of the different information will be evaluated in terms of the different information will be evaluated in terms of the national interests and security interests of the USSR and Iran.

The security of the data transfer will be evaluated in terms of the different information will be evaluated in terms of the national interests and security interests of the USSR and Iran.

The security of the data transfer will be evaluated in terms of the different information will be evaluated in terms of the national interests and security interests of the USSR and Iran.

The security of the data transfer will be evaluated in terms of the different information will be evaluated in terms of the national interests and security interests of the USSR and Iran.

The security of the data transfer will be evaluated in terms of the different information will be evaluated in terms of the national interests and security interests of the USSR and Iran.
